

Nottingham City Council

You are invited to a Nottingham Carbon Club event kindly supported by No.1 Nottingham Science Park. **Friday 5th June** (World Environment Day)

Energy Options in Nottingham

Solar, ground source heat, biomass, district heating, CHP units, wind turbines?. There are many different renewable energy options available for the commercial sector, but which suit your company the most, are they easy to install, does it work, what are the costs / savings / payback times?

During our last event there was some debate over exactly this question. This event provides the opportunity for the answer:

- Hear speakers give independent guidance on renewable energy options
- Learn about energy from waste
- Learn about the Carbon Reduction Commitment
- Debate on Nottingham's long term energy strategy

Provisional Speakers:

Ian Lindley & Andrew Estrop (with commercial sector customer) – Enviro-Energy
Jerome Baddeley – Nottingham Energy Partnership

After the event there will also be an opportunity to learn about the award winning sustainable design features of No1 Nottingham Science Park via a guided tour for the facility. (11:00 – 12:00)

Venue:

No 1 Nottingham Science Park
Jesse Boot Avenue
Off University Boulevard
Nottingham
NG7 2RU

Date:

9-11am Friday 5th June 2009 (8:30 for a 9:00 start)

Getting There

Bus

Bus no's 13 and 14 provide an excellent service to No.1 Nottingham Science Park from Nottingham City Centre and Beeston. During University term time the no.34 service also runs from Nottingham City Centre.

Cycle

No.1 Nottingham Science Park is well served by dedicated cycle routes. (via the canal path on Nottingham Canal)

Car Parking

Car parking will be available on the day, however we do encourage you to use public transport or the cycle paths. Science Park staff will be available on the day to give you access to the car park. No.1 Nottingham Science Park is designed such that cars should not dominate the outside environment. Car parking is hidden under the building to emphasise the beauty and biodiversity of the Lilypad boardwalk and surrounding parkland.
